## **BemSCO FOD Prevention Policy**

The Provider will develop and implement a FOD Prevention Program that includes, as a minimum, the following:

- Clean As You Go policy
- FOD Prevention work instructions specific for each manufacturing area
- Periodic self–assessments of each manufacturing area in accordance with written checklists
- Employee FOD Prevention training
- Management review of the FOD Prevention Program on a regular basis to assess the effectiveness of the training, procedures, and objective evidence of FOD inspection.
- Use of Pareto and/or trend charts to summarize and analyze assessment findings and identify opportunities for improvement
- A system for reporting FOD incidents to management, investigating root cause and implementing corrective action
- A method for formally notifying BemSCO of delivery of product known or suspected to be contaminated with foreign objects.
- Inspection documentation must contain a FOD check.
